New Product Announcement:
Mini DisplayPort to HDMI Adaptor

Computer video isn't just for the boardroom anymore. Today's computers are the hub that connects people to a vast universe of high-definition video content from all around the worldwide web. Past and current Mac computers come equipped with Mini DisplayPort video outputs, and AudioQuest's Mini DisplayPort-to-HDMI adaptor is a small, simple solution that connects any Mini DisplayPort-equipped computer to any HDTV or AV receiver with HDMI inputs. Just connect the adaptor to the computer, and then connect an HDMI cable from the adaptor to the HDTV or receiver. Delivering a computer's video output to a big-screen HDTV can be as simple as that.

Mini DisplayPort to HDMI Adaptor
